

## Author Index Volume 3 (1985)

(The issue number is given in front of page numbers)

<b>Afsarinejad, K.</b> , see <b>Y. Dodge</b>	(3) 187-200
<b>Bailey, R.A.</b> , A note on loosely balanced incomplete block designs <sup>3</sup>	(2) 115-117
<b>Bailey, R.A.</b> , Response to R.F. Cromp and N.V. Findler <sup>3</sup>	(2) 121-122
<b>Baker, R.J., M.R.B. Clarke and P.W. Lane</b> , Zero entries in contingency tables <sup>2</sup>	(1) 33- 45
<b>Baker, R.J., M.R.B. Clarke and P.W. Lane</b> , Further comment on M.B. Brown and C. Fuchs, "On maximum likelihood estimation in sparse contingency tables" <sup>3</sup>	(2) 125-127
<b>Baker, R.J., M.R.B. Clarke and P.W. Lane</b> , Comment on the Rejoinder by M.B. Brown and C. Fuchs <sup>3</sup>	(2) 131
<b>Barlow, W.E. and P. Feigl</b> , Analyzing binomial data with a non-zero baseline using GLIM <sup>3</sup>	(3) 201-204
<b>Brown, M.B. and C. Fuchs</b> , Rejoinder to Comment by Baker, Clarke and Lane <sup>3</sup>	(2) 129-130
<b>Brown, M.B.</b> , Rejoinder to Kullback and Keegel note on the minimum discrimination information approach <sup>3</sup>	(2) 143-144
<b>Clarke, M.R.B.</b> , see <b>R.J. Baker</b>	(1) 33- 45
<b>Clarke, M.R.B.</b> , see <b>R.J. Baker</b>	(2) 125-127
<b>Clarke, M.R.B.</b> , see <b>R.J. Baker</b>	(2) 131
<b>Cléroux, R.</b> , see <b>P. Robert</b>	(1) 25- 32
<b>Cromp, R.F. and N.V. Findler</b> , Rejoinder to R.A. Bailey's critique "A note on loosely balanced incomplete block designs" <sup>3</sup>	(2) 119-120
<b>Cromp, R.F. and N.V. Findler</b> , Reply to R.A. Bailey's response <sup>3</sup>	(2) 123-124
<b>Denteneer, D. and A. Verbeek</b> , A fast algorithm for iterative proportional fitting in log-linear models <sup>1</sup>	(4) 251-264
<b>Dodge, Y. and K. Afsarinejad</b> , Minimal 2 <sup>n</sup> connected factorial experiments <sup>3</sup>	(3) 187-200
<b>Feigl, P.</b> , see <b>W.E. Barlow</b>	(3) 201-204
<b>Findler, N.V.</b> , see <b>R.F. Cromp</b>	(2) 119-120
<b>Findler, N.V.</b> , see <b>R.F. Cromp</b>	(2) 123-124
<b>Fuchs, C.</b> , see <b>M.B. Brown</b>	(2) 129-130
<b>Gebski, V.J.</b> , Some properties of splicing when applied to non-linear smoothers <sup>1</sup>	(3) 151-157
<b>Gupta, R., R. Tripathi, J. Michalek and T. White</b> , An exact test for the mean of a normal distribution with a known coefficient of variation <sup>1</sup>	(4) 219-226
<b>Haber, M.</b> Maximum likelihood methods for linear and log-linear models in categorical data <sup>1</sup>	(1) 1- 10

<sup>1</sup> Appeared in Section I (Methodology).

<sup>2</sup> Appeared in Section II (Applications and Comparative Studies).

<sup>3</sup> Appeared in Section III (Notes).

**Heilbrun, L.K. and D.L. McGee** Sample size determination for the comparison of normal means when one sample size is fixed<sup>1</sup> (2) 99–102

**Kappenman, R.F.**, Estimation for the three-parameter Weibull, lognormal and gamma distributions<sup>1</sup> (1) 11– 23

**Keegel, J.C.**, see **S. Kullback** (2) 133–141

**Keegel, J.C.**, see **S. Kullback** (2) 145–146

**Kroonenberg, P.M.**, see **A. Verbeek** (3) 159–185

**Kullback, S. and J.C. Keegel**, The minimum discrimination information approach to the analysis of contingency tables<sup>3</sup> (2) 133–141

**Kullback, S. and J.C. Keegel**, Response to M.B. Brown<sup>3</sup> (2) 145–146

**Lane, P.W.**, see **R.J. Baker** (1) 33– 45

**Lane, P.W.**, see **R.J. Baker** (2) 125–127

**Lane, P.W.**, see **R.J. Baker** (2) 131

**Lesage, J.P. and S.D. Simon**, Numerical accuracy of statistical algorithms for microcomputers<sup>2</sup> (1) 47– 57

**Matuszewski, A. and D. Sotres**, A basic statistical problem: Confidence interval for the Bernoulli parameter<sup>2</sup> (2) 103–114

**Matuszewski, A. and D. Sotres**, A simple test for the Behrens–Fisher problem<sup>1</sup> (4) 241–249

**McGee, D.L.**, see **L.K. Heilbrun** (2) 99–102

**Michalek, J.**, see **R. Gupta** (4) 219–226

**Ranger, N.**, see **P. Robert** (1) 25– 32

**Robert, P., R. Cléroux and N. Ranger**, Some results on vector correlation<sup>1</sup> (1) 25– 32

**Sadler, W.A. and M.H. Smith**, A reliable method of estimating the variance function in immunoassay<sup>1</sup> (4) 227–239

**Simon, S.D.**, see **J.P. Lesage** (1) 47– 57

**Smith, M.H.**, see **W.A. Sadler** (4) 227–239

**Sotres, D.**, see **A. Matuszewski** (2) 103–114

**Sotres, D.**, see **A. Matuszewski** (4) 241–249

**Tango, T.**, Statistical model of changes in repeated multivariate measurements associated with the development of disease<sup>1</sup> (2) 77– 88

**Tripathi, R.**, see **R. Gupta** (4) 219–226

**Verbeek, A. and P.M. Kroonenberg**, A survey of algorithms for exact distributions of test statistics in  $r \times c$  contingency tables with fixed margins<sup>2</sup> (3) 159–185

**Verbeek, A.**, see **D. Denteneer** (4) 251–264

**Wang, C.M.**, Applications and computing of mosaics<sup>1</sup> (2) 89– 97

**White, T.**, see **R. Gupta** (4) 219–226

# Package Report/Review Index Volume 3 (1985)

(The issue number is given in front of page numbers)

Elsevier Scientific Software	(1) 60
OMNISENSE	(4) 274
P-STAT on IBM PC/XT and PC/AT	(1) 67
P-STAT 8	(1) 68
QScan	(4) 275
SAS/AF Software for end users	(3) 213
SAS/IML Software	(3) 214
SAS System on IBM PC	(3) 212
SAS Version 5	(3) 215
SPSS Graphics for DEX VAX/VMS	(3) 210
SPSS/PC +	(4) 277
SPSS Tables Software	(4) 208
SPSS-X software for VAX	(1) 72
Statpro for the IBM PC	(1) 59
StatWorks for Macintosh	(3) 207
